CONTENTS

Tectonophysics Volume 149

Research Papers

Geometric models of folding at Loch Monar, Scotland, using computer simulation
Watkinson, A.J. and Thiessen, R.L. (Pullman, Wash., U.S.A.) 1

Finite deformation in and around a fluid sphere moving through a viscous medium: implications for diapiric ascent
Schmeling, H., Cruden, A.R. and Marquart, G. (Uppsala, Sweden) 17

Salt tectonics in the Norwegian–Danish Basin
Hospers, J., Rathore, J.S., Feng Jianhua, Finnstrøm, E.G. and Holthe, J. (Trondheim, Norway) 35

Paleozoic paleo-cover of the southern part of the Fennoscandian Shield—fission track constraints
Zeck, H.P. (Copenhagen, Denmark), Andriessen, P.A.M. (Amsterdam, The Netherlands), Hansen, K. (Copenhagen, Denmark), Jensen, P.K. (Roskilde, Denmark) and Rasmussen, B.L. (Copenhagen, Denmark) 61

Geochemistry and petrogenesis of the Lanzo peridotite body, western Alps
Bodinier, J. (Montpellier, France) 67

Mesozoic evolution of Northeast Asia and the collision of the Okhotsk microcontinent
Jolivet, L.J., Cadet, J.P. and Lalevée, F. (Paris, France) 89

Subduction of the Bougainville seamount (Vanuatu): mechanical and geodynamical implications
Dubois, J., Deplus, C., Diament, M. (Orsay, France), Daniel, J. and Collot, J.-Y. (Noumea, New Caledonia) 111

Opening of the Grenada back-arc Basin and evolution of the Caribbean plate during the Mesozoic and Early Paleogene
Bouysse, P. (Orléans and Brest, France) 121

Magma generation in the Lesser Antilles: geological constraints
Westercamp, D. (Orléans, France) 145

In situ measurements of elastic wave velocity in a mine, and the effects of water and stress on their variation
Yukutake, H. (Osaka, Japan), Nakajima, T. and Doi, K. (Kyoto, Japan) 165

On the probability of the time of occurrence of the largest aftershock and of the largest foreshock in a seismic sequence
Tsapanos, T.M., Karakaisis, G.F., Hatzidimitriou, P.M. and Scordilis, E.M. (Thessaloniki, Greece) 177

Letter Section

Permeability of the oceanic crust based on experimental studies of basalt permeability at elevated pressures
Christensen, N.I. (West Lafayetta, Ind., U.S.A.) and Ramananantoandro, R. (Athens, Ohio, U.S.A.) 181

Research Papers

Volcanic eruptions and wide-area geophysical anomalies
Rikitake, T. (Tokyo, Japan) 187

Three-dimensional velocity structure and hypocenter distribution in the Campi Flegrei caldera, Italy
Aster, R.C. and Meyer, R.P. (Madison, Wisc., U.S.A.) 195

Tectonic stresses and volcanism: in-situ stress measurements and neotectonic investigations in the Etna area (Italy)
Bousquet, J.-C. (Montpellier, France), Lanzafame, G. (Catania, Italy) and Paquin, C. (Orsay, France) 219

Tectonic erosion and accretion in steady-state trenches
Charleton, T.R. (Egham, Surrey, Great Britain) 233

Great Slave Lake Shear Zone, Canadian Shield: reconstructed vertical profile of a crustal-scale fault zone
Hanmer, S. (Ottawa, Ont., Canada) 245

A model of interseismic stress evolution in a transcurrent shear-zone
Dragoni, M. (Bologna, Italy) 265

Synthesis of strong motions by using an aftershock record as the Green's function
Murumatu, I. and Ohnuma, H. (Gifu, Japan) 275

Interpretation of observed ground level changes due to the 1905 Kanga earthquake, Northwest Himalaya
Chander, R. (Roorkee, India) 289

Deep structure and tectonics of the Burmese arc: constraints from earthquake and gravity data
Mukhopadhyay, M. (Dhanbad, India) and Dasgupta, S. (Calcutta, India) 299

The use of Mohr circles to describe non-coaxial progressive deformation
Passchier, C.W. (Utrecht, The Netherlands) 323

Fold interference structures and coaptation folds
Stauffer, M.R. (Saskatoon, Sask., Canada) 339
Plastic anisotropy and geometrical hardening in quartzites
Takeshita, T. and Wenk, H.-R. (Berkeley, Calif., U.S.A.) 345

Contents Volume 149 363
